

Home page:

Have meet:

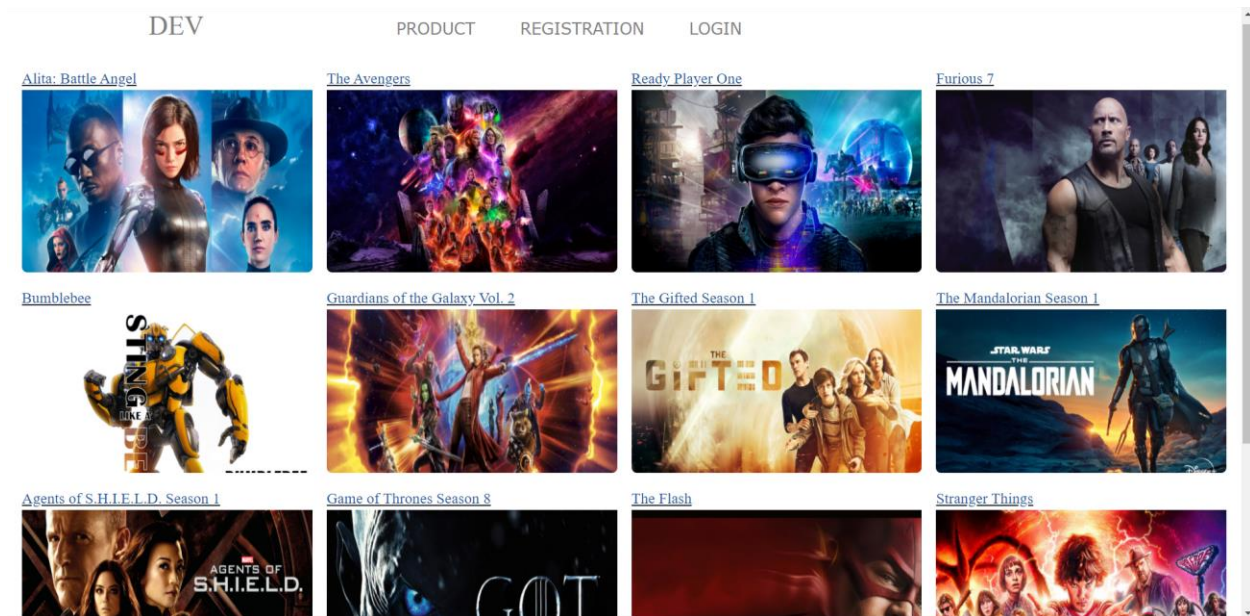

I have created a header bar and it contains 4 different links, user could navigate to the place he wants.

Slider: Under haeder bar has a slider contains 3 featured movies & tv shows, user could click to rool to next image (by using bootstrap to help with).

Featre Flim & Tv Show: contain 4 featrued movies for user.

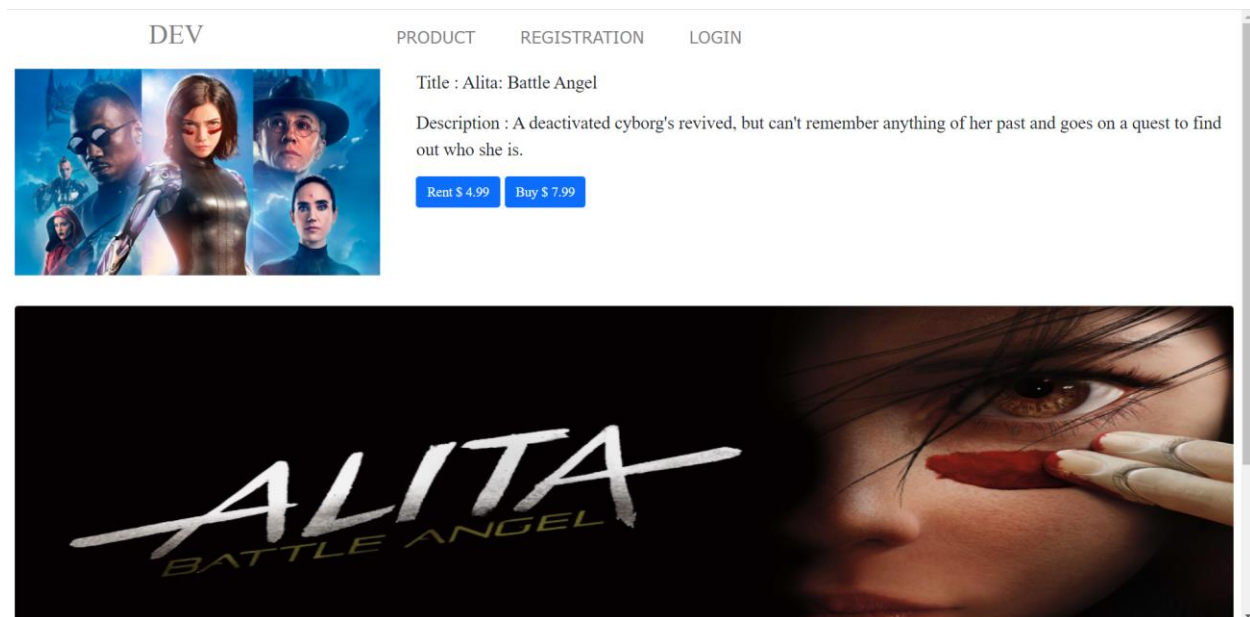

Footer: contain copy right and two links that user can use it to navigate to these two website.

Haven't meet: Content Section.

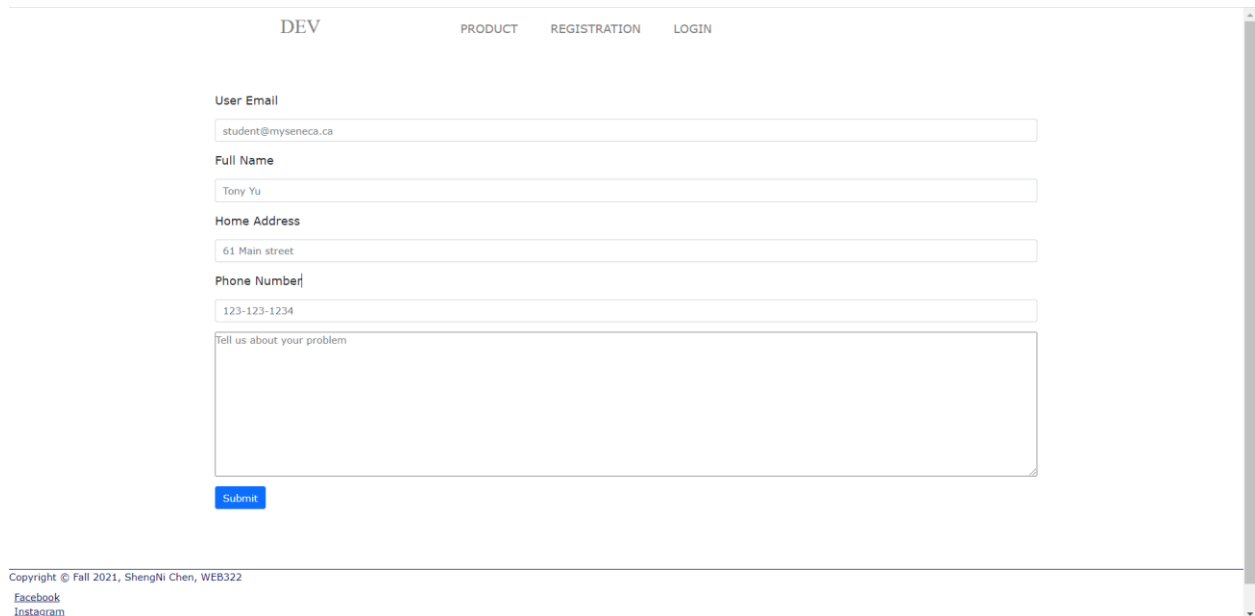

Meet:

Product list page: by using grid to fake database layout movies and tv shows. Name is on top of the image. User could click image to navigate to the detail page.

Meet: title of the movie/tv show, synopsis, small poster, large poster, the price to rent the movie or tv show and the price to purchase it outright.

Product detail page: Contains large and small poster, price, title. User could see the detail of the movie or tv shows. Price is a button user could click it to buy it.
